FOR IMMEDIATE RELEASE

Internet Food Service for SRS Employees Sought

Greater Aiken-Augusta area food service companies are invited to consider providing meal ordering via the internet for delivery to SRS employees

AIKEN, S.C. – (May 9, 2013) – Savannah River Nuclear Solutions (SRNS) is seeking restaurants and food catering companies interested in offering Savannah River Site (SRS) employees the ability to order fully-prepared meals through the Internet or by phone for pick up later at designated points throughout SRS.

SRNS procurement personnel are currently in the process of determining market place interest and qualifications for development and operation of this new food service.

Once selected, vendors will provide a web-based interface where SRS employees can examine a menu and place an order for food service via credit or debit card payment.

Typical service will include online and telephone ordering one day in advance, up to and including the day of delivery.

A lunch-only service, vendors would deliver orders to designated pickup points across SRS per a schedule created by SRNS personnel. These locations will change on a weekly, rotational basis, providing employees access to a variety of participating businesses.

Those vendors interested in more information regarding this opportunity, should contact Lionel Williams, lionel.williams@srs.gov, (803) 952-6091, or Brittany Bartles, brittany.bartles@srs.gov, (803) 952-6873.

SRNS will provide the necessary documentation, schedules and consultation as required for the food service to be provided. SRNS reserves the right to procure food service utilizing other options and vendors.

This expression of interest does not commit SRNS to issue a future solicitation for these services, to award a subcontract, or to pay any costs incurred in the development and submission of any response.

Savannah River Nuclear Solutions, LLC, is a Fluor led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy's Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
